CONTENTS

Developments in Calorimetry 1991. A Selection of Papers Presented at the Ninth Ulm Conference, Ulm, F.R.G., 18–19 March 1991

Foreword vii
Microcalorimetric studies of aerobic growth of Candida maltosa. I. Chemostat cultures
B. Zentgraf (Leipzig, F.R.G.) 1
Microcalorimetric studies of aerobic growth of Candida maltosa. II. Batch cultures
B. Zentgraf (Leipzig, F.R.G.) 9
Microcalorimetric investigations of microbial activities: Decomposition of needle litter under laboratory conditions
M. Becker, G. Kraepelin and I. Lamprecht (Berlin, F.R.G) 15
White adipocytes in primary culture. Long-term microcalorimetric and biochemical investigations
H. Böttcher, S. Engel and P. Fürst (Stuttgart, F.R.G.) 27
Some like it hot. Calorimetric investigations of voodoo lilies
I. Lamprecht, K. Drong, B. Schaarschmidt and G. Welge (Berlin, F.R.G.) 33
Effects of the cytostatic drug 1-(2-hydroxyethyl)-3-(2-chloroethyl)-3-nitrosourea (HECNU) on heat production and intermediary metabolism of diploid human fibroblasts IMR 90
J. Nittinger and P. Fürst (Stuttgart, F.R.G.) 41
Influence of liming on microbial degradation of pine needles. Differential scanning calorimetrical investigation
U. Reh, M. Becker, G. Kraepelin and I. Lamprecht (Berlin, F.R.G.) 49
Microcalorimetric monitoring of ischemic tissue metabolism: Influence of incubation conditions and experimental animal species
D. Singer, F. Bach, H.J. Bretschneider and H.-J. Kuhn (Goettingen, F.R.G.) 55
Heat production of frogs under normoxic and hypoxic conditions: A microcalorimetric study using a gas flow system
C. Schulz, M. Thuy and G. Wegener (Mainz, F.R.G.) 71
Excess enthalpy of the system butyl acetate + butan-1-ol + acetic acid + water at 313 K and ambient pressure
M. Bender, A. Heintz and R.N. Lichtenthaler (Heidelberg, F.R.G.) 79
Test measurements and analysis of errors for a new equipment for the determination of excess-heat data
H. Huemer, E. Platzer (Graz, Austria) and K. Rehak (Prague, Czechoslovakia) 95
Excess enthalpies of binary mixtures containing either methylcyclopentane or methylcyclohexane
E. Wilhelm (Wien, Austria), A. Inglese (Bari, Italy) and J.-P.E. Grolier (Aubière, France) . . . 113
A new kind of parameter estimation of reactions under dynamic temperature programme
J. Mentel and H. Anderson (Greifswald, F.R.G.) 121
The influence of chemical structure on exothermic decomposition
T. Grewer (Frankfurt am Main, F.R.G.) 133
Kinetic evaluation of exothermal reactions measured by DSC
E. Kaiserberger and J. Opfermann (Selb, F.R.G.) 151
The theorem of common kinetic runs – a concept against an unorganized data overflow in reaction kinetics
E. Koch (Mülheim an der Ruhr, F.R.G.) 159
DSC-studies of flour confectionery
K. Münzing and G. Brack (Detmold, F.R.G.) 167
Calorimetric evidence for structural transitions of higher order in the pore water of pressed silicic acid by using DSC
G. Peschel and R. Krämer (Essen, F.R.G.) 175

Influence of PBT crystallization on miscibility degree of amorphous phase in PC/PBT melt blends
G. Pompe, E. Meyer, H. Komber and H. Hamann (Dresden, F.R.G.) 185
An experimental approach to the characterisation of unstable chemical systems
W. Schwanebeck (Wiesbaden, F.R.G.) 201
Equipments for modern thermal investigations
H. Anderson, H. Lubenow, W. Klingner and K. Heldt (Greifswald, F.R.G.) 211
Design, specifications and application of a high pressure DSC cell
K. Blankenhorn and G.W.H. Höhne (Ulm, F.R.G.) 219
The problem of convection in the water absorbed dose calorimeter
S.R. Domen (Gaithersburg, MD, U.S.A.), A. Krauss and M. Roos (Braunschweig, F.R.G.) . . . 225
The use of differential scanning calorimetry in chemical education. Part 1. A general description
G. van der Plaats (Sittard, The Netherlands), B. Benzler (Giessen, F.R.G.) and L. Meier (Greifensee, Switzerland) 235
An isoperibolic self-made calorimeter for the measurement of redox-initiated polymerization reactions
H. Utschick, H.-J. Mallon and W. Unseld (Halle, F.R.G.) 239
New pressure DSC module for applications to 7 MPa
H.G. Wiedemann (Greifensee, Switzerland) 245
Reconstruction of a Perkin-Elmer DSC-2 to a computer-driven calorimeter
W. Winter and G.W.H. Höhne (Ulm, F.R.G.) 257
Determination of peak base line for semicrystalline polymers
M. Alsleben, C. Schick and W. Mischok (Güstrow, F.R.G.) 261
The deconvolution of DSC-curves in the experimental time domain
H.J. Flammersheim, N. Eckardt (Jena, F.R.G.) and W. Kunze (Überlingen, F.R.G.) 269
Modification of the conventional measuring method to determine the specific heat capacity using a Perkin-Elmer DSC 2
E. Hanitzsch (Braunschweig, F.R.G.) 275
From DSC curve to thermodynamic potential function
G.W.H. Höhne (Ulm, F.R.G.) 283
Treatment of a power compensated scanning calorimeter by the field equation of heat conduction
H. Hoff (Ulm, F.R.G.) 293
Theoretical investigations of the heat transfer at quantitative DSC-measurements and its influence on the determination of the thermal and calorimetrical properties
W. Poeßnecker (Dresden, F.R.G.) 309
Determination of characteristic temperatures with the scanning calorimeter
S.M. Sarge (Braunschweig, F.R.G.) 323
Influence of the heat conductivity of the sample on DSC curves and its correction
J. Schawe and C. Schick (Güstrow, F.R.G.) 335
On temperature calibration of power compensation DSC in cooling mode
C. Schick (Güstrow, F.R.G.) and G.W.H. Höhne (Ulm, F.R.G.) 351
An algorithm for the reconstruction of the true specimen signal of a differential scanning calorimeter
St. Wiesner and E. Woldt (Braunschweig, F.R.G.) 357
